An Overview

CentriVap Vacuum Concentrators use a combination of centrifugal force, vacuum and heat to speed evaporation of multiple small samples in applications such as molecular biology, proteomics, genomics, cell biology, microbiology, biochemistry, drug discovery and analytical chemistry. Labconco offers concentrators in two chamber sizes to meet your throughput needs: CentriVap micro IR Vacuum Concentrators and CentriVap Vacuum Concentrators.

CentriVap micro IR Vacuum Concentrators — small, yet complete

For small throughput, small samples such as DNA, and personal use, the CentriVap micro IR Vacuum Concentrator has an infrared-emitting lid to add heat to the chamber and reduce condensation. It has a small footprint yet is packed with features. A rotor that holds 24 each 0.5 ml microcentrifuge tubes is included. A built-in diaphragm vacuum pump aids evaporation. A built-in glass trap collects moisture to protect the pump. A CentriZap™ micro IR strobe light allows the user to view samples while spinning. Everything needed to begin evaporation is provided.

CentriVap Vacuum Concentrators — greater throughput, many choices

CentriVap Vacuum Concentrators with 12" diameter chambers come in a variety of configurations and styles to suit a variety of needs. The larger chamber allows as many as 132 samples to be processed at once. Sample sizes range from a few microliters up to 125 milliliters. In addition, Microtiter Plate Rotors hold up to six standard or three deep-well plates.
Some CentriVap Concentrators have additional design features to meet specific application needs. The Refrigerated CentriVap Vacuum Concentrator combines refrigeration with heat to safely evaporate heat-sensitive samples. The Acid-Resistant CentriVap Concentrator, available as a standard benchtop or refrigerated benchtop, is constructed with chemical-resistant components throughout the vapor path for use with samples containing a variety of chemicals.

The CentriVap Mobile System and CentriVap DNA Concentrator house all the components necessary to begin concentration in one convenient cabinet. The CentriVap Mobile System consists of a portable console cabinet with the concentrator, cold trap and space inside for an accessory vacuum pump. The CentriVap DNA Concentrator is a compact benchtop model with a built-in diaphragm pump.

For ease of ordering, Labconco has application-specific CentriVap Systems, each organized under one catalog number. Systems specifically designed for aqueous, acid, solvent or proteomic-based applications are offered. In addition, the CentriVap Gel Dryer System includes a Labconco Gel Dryer so that the CentriVap Cold Trap and accessory vacuum pump may be shared by the electrophoresis and concentration equipment.

Programmability and other microprocessor-controlled features make the CentriVap Concentrators easy to use and allow unattended operation. Up to nine different protocols consisting of temperature, heat time and run time may be entered and stored into memory. Programs 1, 2 and 3 as designated by the user may be quickly accessed by pressing one of three Quick-Start™ buttons. To protect sensitive samples from excessive heat exposure after samples have evaporated, the heat time may be programmed to shut off sooner than the run time. An audible alarm alerts the user when the run time has expired.

The microprocessor-controlled heater directs heat from OFF to 100° C upward through the bottom of the chamber. To further speed evaporation, the optional Heat Boost™ feature surrounds the chamber wall with additional heat, at the same user-programmed temperature.

CentriVap Cold Traps — vacuum pump protection

CentriVap -50 Cold Traps help protect the accessory vacuum pump from the corrosive effects of vapors and fumes as they evaporate from the samples. The CentriVap -84 and -105 Cold Traps provide protection from low freezing point solvents. Besides use with concentrators, these cold traps may be coupled with vacuum pumps for use with other applications such as freeze drying or desiccation.
With the smallest footprint available, the CentriVap® micro IR Vacuum Concentrator fits in tight spaces and is ideal for small samples such as DNA and small throughput in molecular biology, proteomics, genomics, genetics, cell biology and drug discovery labs. Weighing only 20 pounds, this personal-sized concentrator may be easily transported from lab to lab.

Everything about the CentriVap micro IR is small except its many features. Its transparent infrared (IR) glass lid directs heat to the samples to speed evaporation and reduces cross contamination from condensation. The CentriVap micro IR includes a rotor for twenty-four small samples, a CentriZap™ micro IR strobe light to view samples while the rotor is spinning, a built-in diaphragm pump and glass trap — everything you need to start concentrating. Simply plug it in and it’s ready to use.

IR-emitting glass lid
Teflon*-coated aluminum rotor
Built-in Teflon*-coated diaphragm pump
Teflon*-coated chamber

*Teflon® is a registered trademark of E.I. du Pont de Nemours.
Features & Benefits

Ideal for small throughput and sample sizes.
The chamber holds one of five different rotors with capacities from 24 x 0.5 ml microcentrifuge tubes to 8 x 30 ml vials.

Smallest footprint available.
The shaded area on these pages shows the CentriVap micro IR’s actual footprint. Its compact footprint, only 8.8” wide x 10.4” deep x 8.9” high (22.4 x 26.4 x 22.6 cm), requires little bench space or storage space.

Teflon*-coated chamber.
Resists corrosion, adds durability.

IR-emitting glass lid.
Adds heat to the chamber to speed evaporation while helping to prevent condensation that can contribute to sample cross contamination. Glass resists etching from certain chemicals.

CentriZap micro IR strobe light included.
Enables the user to shine a strobe light into the chamber to easily view samples while the rotor is spinning. Samples appear to be standing still. Saves time necessary to stop the rotor and lift the lid to check sample dryness.

Teflon*-coated aluminum rotor is included. Accommodates 24 each 1.5 ml microcentrifuge tubes. Other accessory rotors are available.

Built-in Teflon*-coated diaphragm pump.
Corrosion-resistant diaphragm pump achieves ultimate vacuum of 160 mBar and pumping capacity of 5.5 liters per minute. Oil-free pump is low maintenance.

Microprocessor-controlled 300-watt heater.
Speeds evaporation by supplying a controlled amount of heat from 35° C to 65° C in 0.1 degree increments. “Standby” setting allows chamber to preheat before sample processing.

Centrifugal motion of 1700 rpm.
Eliminates bumping and foaming common when applying vacuum during evaporation and maximizes recovery of trace solutes.

Quiet operation.
The magnetic induction drive and pump run quietly with low vibration.

Fast evaporation.
Using Rotor 7548500, 24 each 1 ml samples in 1.5 ml microcentrifuge tubes, and the IR lid heat function, fast evaporation times were achieved.

Vacuum gauge.
Built-in front-mounted analog vacuum gauge indicates pump function.

Easy-to-read LCD display.
Prompts the user to set heat and time, displays actual temperature during “Standby” and “Run.”

75 ml Glass trap.
Protects the pump and the environment. For greater trapping ability, the rear-mounted trap may be placed in an ice bath.

ETL listed.
Model 7701020 carries the ETL Testing Laboratories seal in the U.S. and the ETL-C seal in Canada, signifying it meets or exceeds all requirements of UL Standard 61010A-1 and CAN/CSA C22.2 No. 1010.1.

CE Mark.
All 230 volt models conform to the CE (European Community) requirements for electrical safety and electromagnetic compatibility.

Reliability guarantee.
Full one year warranty is provided against defects in materials and workmanship.

Shaded area represents actual footprint of the CentriVap® micro IR.

Controls

**LCD display.** Shows set point temperature and time while in set up mode and actual temperature and time while in run mode.

**START/STOP button.** Press to start or stop a run and to reset the timer.

**TIME button.** Press to display time remaining.

**SET button.** Press to program temperature and time.

**Increase/Decrease buttons.** Press to increase or decrease the last selected set point parameter.

**STANDBY light.** Illuminates during preheating.

**POWER light.** Illuminates when in Standby or Run mode.

**Heat Selector.** Use to select IR only, IR/Heat or Heat only.

**Run Mode Selector.** Use to select Off, Standby (preheat) or Run mode.

Optional Accessories

**Teflon-Coated Aluminum Rotors**
Hold tubes at an angle to maximize surface area. Easily interchangeable. **Rotor 7548500 is included with each CentriVap micro IR.** Sample containers are not included. Shipping weight 1 lb. (0.5 kg)

**Tubes should be filled no more than 1/3 to 1/2 of tube volume to prevent loss of sample during rotation.**

7549000 **CentriZap micro IR Strobe Light, Replacement**
Enables user to shine a strobe light into the CentriVap micro IR's chamber to easily view samples while the rotor is spinning. Included with each CentriVap micro IR. Shipping weight 1 lb. (0.5 kg)
Specifications

- Compact dimensions. Footprint: 8.8” w x 10.4” d x 8.9” high (22.4 x 26.4 x 22.6 cm). Overall depth, including glass trap: 12.9” (32.8 cm).
- IR-emitting transparent glass lid.
- Teflon*-coated aluminum chamber.
- Teflon*-coated aluminum rotor included for 24 each, 1.5 ml microcentrifuge tubes.

Built-in Teflon*-coated diaphragm pump with ultimate vacuum of 160 mBar and displacement capacity of 5.5 liters/minute.
- CentriZap micro IR strobe light included.
- 300-watt heater.
- Microprocessor-controlled programming for run time either continually or in hours and minutes from 0 to 99 hours and 0 to 59 minutes, and heat setting of 35° C to 65° C in 0.1 degree increments.
- Centrifugal motion of 1700 rpm achieved by magnetic induction drive.
- Analog vacuum gauge.
- LCD for programming and actual temperature/time display.
- 75 ml Glass trap.
- One year warranty on materials and workmanship.
- ETL & ETL-C listing on model 7701020.
- CE mark on models 7701030, 7701035 and 7701037.
- Actual weight 20 lbs. (9.1 kg)
- Shipping weight 25 lbs. (11.3 kg)

Required Accessories (not included)
- Sample tubes. Contact your laboratory supply dealer.

Optional Accessories
- Rotors. See page 6.

CentriVap Benchtop Vacuum Concentrators are designed to rapidly concentrate multiple small samples using centrifugal force, vacuum and heat. You may purchase the individual components separately—concentrator, cold trap, rotor and pump—to suit your individual needs. Or, purchase an application-specific CentriVap System, which includes the concentrator, cold trap, chemical trap and rotor organized under one catalog number for easy ordering. Aqueous, Solvent or Acid Systems are available. CentriVap Gel Dryer Systems consist of the Labconco Gel Dryer combined with the CentriVap Benchtop Concentrator and Cold Trap. See pages 30 and 31 for System ordering information.
**Features & Benefits**

- **Sleek styling.**
  Brushed stainless steel front panel and blue accents enhance appearance. Compact design has a small footprint.

- **Microprocessor-controlled centrifugal motion.**
  Centrifugal force eliminates bumping and foaming common when applying vacuum during evaporation and maximizes recovery of trace solutes. Centrifugal motion is provided by a brushless motor capable of achieving up to 1725 rpm.

- **Quick-Stop™ System.**
  Once run time has expired or the RUN/STOP button is pressed, within seconds the vacuum pump stops, the valve opens to bleed air into the chamber, and the rotor stops.

- **Automatic vacuum release valve.**
  Prevents loss of sample by releasing the vacuum before the rotor stops and during power failures. The larger valve takes less time to release the vacuum.

- **Lid latch with safety sensor.**
  Locks the lid in place when the rotor is turning and prevents start up when the lid is open.

- **Larger chamber holds more samples for greater throughput.**
  The 12” diameter chamber accommodates a variety of rotors that hold up to 132 samples. The 6-Place Microtiter Plate Rotor holds six standard 96-well plates or three deep well plates. Thick-wall aluminum chamber is epoxy-coated for chemical resistance.

- **Large, phenol-free lid seal.**
  Ensures good vacuum without potential for phenol contamination.

- **Acrylic lid is standard; glass lid is optional.**
  When applications involve solvents which attack acrylic, order CentriVap Concentrator with glass lid.

- **Built-in vacuum delay.**
  Prevents bumping by allowing the rotor to achieve speed before applying vacuum.

- **Microprocessor-controlled 300-watt heater.**
  Speeds evaporation by supplying a controlled amount of heat from OFF up to a maximum of 100°C in one degree increments.

- **Optional microprocessor-controlled 300-watt Heat Boost.™**
  Surrounds chamber wall to provide additional heat from OFF up to a maximum of 100°C in one degree increments. Unlike radiant lid heaters, heat is supplied within the chamber, decreasing the risk of burn injury.

- **Quick-Start™ One Button Start Up saves time.**
  Pressing just one button starts the rotor, the heater, the timers and the vacuum pump. Three separate Quick-Start Buttons store one user-set program each.

- **Easy-to-read LCD display.**
  Prompts the user to set program parameters and displays program number, actual and set point temperatures, heat time remaining, run time remaining, and if optional Heat Boost is activated.

- **Heat and run times are set separately.**
  Each from 1 to 999 minutes, so that heat may be programmed to shut down sooner than the run to protect heat-sensitive samples from excessive heat exposure after the solvent has evaporated. Once user-set run time has expired, all functions cease.

- **PREHEAT button.**
  Pressing the button activates the heater to begin elevating to set point temperature. When in the preheat mode, the operator can monitor actual heat. Once set point temperature has been reached, samples can be added and program started.

- **Memory stores 9 user-set programs.**
  Parameters of temperature, heat time and run time can be easily set with the touch of a few buttons. In addition, the user may alter temperature and times while the program is in progress.

- **Audible alarm signals completion of set point run time.**
  If it is desired to have the CentriVap run continuously without a set point time, the user may use the increase button until ON is displayed under RUN TIME.

- **Electrical receptacle.**
  Allows connection of accessory vacuum pump so that pump may be activated from control panel and vacuum delay utilized.

- **Vacuum port with quick disconnect fitting.**
  Allows connection of a gauge to the CentriVap for monitoring vacuum level. Vacuum gauge and 1/4” ID tubing are required (not included). Contact Labconco for vacuum gauge recommendations.

- **ETL listed.**
  The CentriVap Concentrators carry the ETL Testing Laboratories seal in the U.S. and the ETL-C seal in Canada, signifying they meet or exceed all requirements of UL Standard 61010A-1 and CAN/CSA C22.2 No. 1010.1.

- **International electrical configurations available.**
  All 230 volt models conform to the CE (European Community) requirements for electrical safety and electromagnetic compatibility.

- **Reliability guarantee.**
  Full one year warranty is provided against defects in materials and workmanship.

Optional Accessories

Optional CentriZap™ Strobe Light.
Enables the user to shine a strobe light into the chamber to easily view samples while the rotor is spinning. Samples appear to be standing still. The gun plugs into an outlet on the back of the CentriVap. A holster bracket is supplied and attaches to the right side of the CentriVap. See page 33.

Optional Glass Lid.
Provides additional protection from solvents and corrosives that attack acrylic. See page 35.

CentriZap Strobe Light allows the user to check sample status without stopping the rotor and opening the lid.
Specifications

- Brushed stainless steel and glacier white, epoxy-coated steel exterior with blue accents.
- Acrylic lid or glass lid, depending on model.
- Lid latch with safety sensor.
- Phenol-free lid gasket.
- Epoxy-coated aluminum chamber.
- 300-watt heater.
- Microprocessor-controlled programming for run time from 1 to 999 minutes, heat from OFF to HI (100°C) in one degree increments, heat from 1 to 999 minutes, and optional Heat Boost on/off. Memory stores 1 to 9 programs.
- LCD for display of program number, actual and set point temperature, heater time remaining, run time remaining, and optional Heat Boost activation.
- Control panel with RUN/STOP button, PREHEAT button, optional HEAT BOOST button, set point SELECT button, increase/decrease buttons, and 3 Quick-Start buttons.
- Centrifugal motion provided by a brushless motor capable of achieving up to 1725 rpm.
- Quick-Stop System to stop vacuum pump, open valve to bleed air into the chamber and stop the rotor within seconds after time expires or RUN/STOP button is pressed.
- Automatic vacuum release valve.
- Built-in vacuum delay allows rotor to achieve speed before applying vacuum.
- Audible alarm to signal completion of set point run time.
- 1/2" OD aluminum hose fitting for connection to vacuum tubing. Vacuum pump is not included.
- Vacuum port with quick disconnect fitting for 1/4" ID tubing.
- An electrical receptacle on the back for connection to an accessory vacuum pump. ETL & ETL-C listing on 115 volt, 60 Hz models.
- CE mark on 230 volt, 50/60 Hz models.
- Overall dimensions with closed lid: 14.7" wide x 19.3" deep x 11.7" high (37.3 x 49.0 x 29.6 cm).
- Actual weight 42 lbs. (19 kg). Shipping weight 48 lbs. (22 kg).

CentriVap Benchtop Vacuum Concentrator 7810010

Built-in Option

- 300-watt Heat Boost from OFF to HI (100°C) in one degree increments, for 1 to 999 minutes, depending on set points programmed for heater.

Required Accessories (not included)

- Diaphragm or Rotary Vane Vacuum Pump. See page 34.
- CentriVap Cold Trap (if using a Rotary Vane Pump). See pages 20-21.
- Rotor. See pages 32-33.
- Sample tubes. Contact your laboratory supply dealer.

Other Accessories (See pages 33-34)

- CentriZap Strobe Light
- Vacuum Controller
- Glass Lid
- Laboratory Carts
The Refrigerated CentriVap Vacuum Concentrator is designed to rapidly concentrate multiple small heat-sensitive samples, such as RNA and proteins, using centrifugal force, vacuum and controlled temperature. This CentriVap is the only commercially available concentrator that combines a refrigeration system that cools to -4°C with a heater that warms to +100°C to achieve the user’s selected set point temperatures. The Refrigerated CentriVap is also part of the CentriVap Proteomic System, which includes the concentrator, cold trap and DNA rotor organized under one catalog number. See page 31 for System ordering information.

For heat-sensitive samples that contain chemicals such as 0.1 to 1% TFA, hydrochloric acid, acetic acid, hydrobromic acid, ammonium hydroxide and sodium hydroxide, Acid-Resistant Refrigerated CentriVap Concentrators are available, which include a Teflon®-coated chamber and other acid-resistant components.
Features & Benefits

- **PREHEAT/COOL button.**
  Pressing the button activates the refrigeration system and heater to reach set point temperature. When in the preheat/cool mode, the operator can monitor actual temperature. Once set point temperature has been reached, samples can be added and program started.

- **Programming holds two temperatures and times.**
  Set points for the first and second temperatures and run times are selected separately. A lower temperature may be programmed for the second run time to protect heat-sensitive samples from excessive heat exposure after the solvent has evaporated. Once the user-set second run time has expired, all functions cease.

- **Microprocessor-controlled cooling and heating.**
  Speeds evaporation while protecting heat-sensitive samples by supplying a controlled amount of cooling or heat from -4° C up to a maximum of +100° C in one degree increments. A temperature sensor monitors the chamber to regulate the activation of the HCFC/CFC-free refrigeration system and/or the 300-watt heater.

- **Microprocessor-controlled centrifugal motion.**
  Centrifugal force eliminates bumping and foaming common when applying vacuum during evaporation and maximizes recovery of trace solutes.

- **Memory stores 9 user-set programs.**
  Parameters of temperature and run time can be easily set with the touch of a few buttons. In addition, the user may alter temperature and times while the program is in progress.

- **Quick-Start™ One Button Start Up saves time.**
  Pressing just one button starts the rotor, the refrigeration and/or heater, the timers and the vacuum pump. Three separate Quick-Start Buttons store one user-set program each.

- **Quick-Stop™ System.**
  Once run time has expired or the RUN/STOP button is pressed, within seconds the vacuum pump stops, the valve opens to bleed air into the chamber, and the rotor stops.

- **Automatic vacuum release valve.**
  Prevents loss of sample by releasing the vacuum before the rotor stops and during power failures. The larger valve takes less time to release the vacuum.

- **Built-in vacuum delay.**
  Prevents bumping by allowing the rotor to achieve speed before applying vacuum.

- **Audible alarm signals completion of set point run time.**
  If it is desired to have the CentriVap run continuously without a set point time, the user may use the increase button until ON is displayed under RUN TIME.

- **Vacuum port with quick disconnect fitting.**
  Allows connection of a gauge to the CentriVap for monitoring vacuum level. Vacuum gauge and 1/4” ID tubing are required (not included). Contact Labconco for vacuum gauge recommendations.

- **Sleek styling.**
  Brushed stainless steel front panel and blue accents enhance appearance. Compact design has a small foot print.

- **Acrylic lid is standard; glass lid is provided on Acid-Resistant models and also available as an option.**
  The glass lid option is recommended when applications involve solvents that attack acrylic.

- **Lid latch with safety sensor.**
  Locks the lid in place when the rotor is turning and prevents start up when the lid is open.

- **Large chamber holds multiple samples for maximum throughput.**
  The 12” diameter chamber accommodates a variety of rotors that hold up to 132 samples. The accessory Microtiter Plate Rotor holds four standard 96-well plates or two deep well plates. Thick-wall aluminum chamber is epoxy-coated for chemical resistance. Acid-Resistant models includes a Teflon-coated aluminum chamber for resistance to more corrosive chemicals such as dilute TFA.

- **Large, phenol-free lid seal.**
  Ensures good vacuum without potential for phenol contamination.

- **Easy-to-read LCD display.**
  Prompts the user to set program parameters and displays program number, actual and set point temperatures, heat time remaining, and run time remaining.

- **Electrical receptacle.**
  Allows connection of accessory vacuum pump so that pump may be activated from control panel and vacuum delay utilized.

- **ETL listed.**
  The CentriVap Concentrators carry the ETL Testing Laboratories seal in the U.S. and the ETL-C seal in Canada, signifying they meet or exceed all requirements of UL Standard 61010A-1 and CAN/CSA C22.2 No. 1010.1.

- **International electrical configurations available.**
  All 230 volt models conform to the CE (European Community) requirements for electrical safety and electromagnetic compatibility.

- **Reliability guarantee.**
  Full one year warranty is provided against defects in materials and workmanship.
Control Panel

PROGRAM.
LCD shows program from 1 to 9, R for run and S for stop.

TIME AT 1.
LCD shows time selected for the first temperature from 1 to 999 minutes.

TIME AT 2.
LCD shows time selected for the second temperature from 0 to 999 minutes.

RUN/STOP button.
Press to start or stop a run.

Increase/Decrease buttons.
Press to increase or decrease the last selected set point parameter.

PREHEAT/COOL button.
Press to turn on the heater or refrigeration system to heat or cool the chamber prior to loading samples.

TEMPERATURE 1.
LCD shows the first temperature selected from -4 to +99°C or HI (100°C). During the run, the LCD shows the actual temperature of the chamber.

TEMPERATURE 2.
LCD shows the second temperature selected from -4 to +99°C or HI (100°C). During the run, the LCD shows the actual temperature of the chamber.

REFRIGERATION.
LCD displays Y when refrigeration is on and N when it is off.

Set Point SELECT button.
To select a parameter to change, press until the arrows on the LCD point to the parameter desired.

Quick-Start™ buttons.
Initiate user-set Program 1, 2 or 3 with a single push of a button.

Optional Accessory

Optional CentriZap™ Strobe Light.
Enables the user to shine a strobe light into the chamber to easily view samples while the rotor is spinning. Samples appear to be standing still. The gun plugs into an outlet on the back of the CentriVap. A holster bracket is supplied and attaches to the right side of the CentriVap. See page 33.

CentriZap Strobe Light allows the user to check sample status without stopping the rotor and opening the lid.
Specifications

- Brushed stainless steel and glacier white, epoxy-coated steel exterior with blue accents.
- Acrylic lid or glass lid, depending on model.
- Lid latch with safety sensor.
- Phenol-free lid gasket.
- Epoxy-coated aluminum chamber or Teflon®-coated aluminum chamber with Hastelloy® shaft, depending on the model.
- 300-watt heater to heat chamber to +100° C.
- HCF/CFC-free refrigeration system to cool chamber to -4° C.
- Sensor that reads chamber temperature.
- Microprocessor-controlled programming for “Temperature 1” from -4° C to +100° C, “Temperature 2” from 1 to 999 minutes or indefinite, “Temperature 2” from -4° C to +100° C, and “Temperature 2” from 0 to 999 minutes or indefinite. Memory stores 1 to 9 programs.
- LCD for display of program number, set point and actual “Temperature 1 and 2,” set point and time remaining for “Temperature 1 and 2,” and refrigeration activation (“Y” or “N”).
- Control panel with RUN/STOP button, PREHEAT/COOL button, set point SELECT button, increase/ decrease buttons, and 3 Quick-Start buttons.
- Centrifugal motion provided by a brushless motor capable of achieving up to 1725 rpm.
- Quick-Stop System to stop vacuum pump, open valve to bleed air into the chamber and stop the rotor within seconds after time expires or RUN/STOP button is pressed.
- Automatic vacuum release valve.
- Built-in vacuum delay allows rotor to achieve speed before applying vacuum.
- Audible alarm to signal completion of set point run time.
- 1/2" OD aluminum hose fitting for connection to vacuum tubing. Vacuum pump is not included.
- Vacuum port with quick disconnect fitting for 1/4" ID tubing.
- Electrical receptacle on the back to connect accessory vacuum pump to the system.
- ETL & ETL-C listing on 115 volt & 230 volt, 60 Hz models.
- CE mark on 230 volt, 50 Hz models.
- Actual weight 95 lbs. (43 kg). Shipping weight 108 lbs. (49 kg).
- Overall dimensions with closed lid: 14.3" wide x 21.7" deep x 16.6" high (36.4 x 55.1 x 42.2 cm).
- Microprocessor-controlled programming for “Temperature 1” from -4° C to +100° C, “Temperature 1” from 1 to 999 minutes or indefinite, “Temperature 2” from -4° C to +100° C, and “Temperature 2” from 0 to 999 minutes or indefinite. Memory stores 1 to 9 programs.
- LCD for display of program number, set point and actual “Temperature 1 and 2,” set point and time remaining for “Temperature 1 and 2,” and refrigeration activation (“Y” or “N”).
- Control panel with RUN/STOP button, PREHEAT/COOL button, set point SELECT button, increase/ decrease buttons, and 3 Quick-Start buttons.
- Centrifugal motion provided by a brushless motor capable of achieving up to 1725 rpm.
- Quick-Stop System to stop vacuum pump, open valve to bleed air into the chamber and stop the rotor within seconds after time expires or RUN/STOP button is pressed.
- Automatic vacuum release valve.
- Built-in vacuum delay allows rotor to achieve speed before applying vacuum.
- Audible alarm to signal completion of set point run time.
- 1/2" OD aluminum hose fitting for connection to vacuum tubing. Vacuum pump is not included.
- Vacuum port with quick disconnect fitting for 1/4" ID tubing.
- Electrical receptacle on the back to connect accessory vacuum pump to the system.
- ETL & ETL-C listing on 115 volt & 230 volt, 60 Hz models.
- CE mark on 230 volt, 50 Hz models.

Other Accessories (See pages 32-35)
- Vacuum Controller
- Laboratory Carts

■ Exclusive feature
Using centrifugal force, vacuum and controlled heat, the Acid-Resistant CentriVap Vacuum Concentrator, with chemical-resistant components throughout the vapor path, rapidly concentrates multiple small samples containing chemicals such as 0.1 to 1% TFA, hydrochloric acid, acetic acid, hydrobromic acid, ammonium hydroxide and sodium hydroxide.

- Microprocessor-controlled 300-watt heater
- Durable acid-resistant components
- Vacuum port with quick disconnect fitting
- Easy-to-read LCD display
- Large Teflon*-coated chamber holds up to 132 samples for greater throughput
- Large, phenol-free lid seal
- Glass lid
- Memory stores 9 user-set programs
- Quick-Start™ One Button Start Up
- Quick-Stop™ System
- Sleek styling

*E.T. is a registered trademark of E.I. du Pont de Nemours.
Durable acid-resistant components.
The aluminum chamber is Teflon*-coated, the lid is glass and other components in the vapor path are constructed of acid-resistant materials for long life. See page 33 for ordering information on Acid-Resistant Rotors.

Microprocessor-controlled centrifugal motion.
Centrifugal force eliminates bumping and foaming common when applying vacuum during evaporation and maximizes recovery of trace solutes.

Memory stores 9 user-set programs.
Parameters of temperature, heat time and run time can be easily set with the touch of a few buttons. In addition, the user may alter temperature and times while the program is in progress.

Quick-Start™ One Button Start Up saves time.
Pressing just one button starts the rotor, the heater, the timers and the vacuum pump. Three separate Quick-Start Buttons store one user-set program each.

Quick-Stop™ System.
Once run time has expired or the RUN/STOP button is pressed, within seconds the vacuum pump stops, the valve opens to bleed air into the chamber, and the rotor stops.

Automatic vacuum release valve.
Prevents loss of sample by releasing the vacuum before the rotor stops and during power failures. The larger valve takes less time to release the vacuum.

Built-in vacuum delay.
Prevents bumping by allowing the rotor to achieve speed before applying vacuum.

Microprocessor-controlled 300-watt heater.
Speeds evaporation by supplying a controlled amount of heat from ambient (OFF) up to a maximum of 100° C in one degree increments.

Heat and run times are set separately.
Each from 1 to 999 minutes or indefinite, so that heat may be programmed to shut down sooner than the run to protect heat-sensitive samples from excessive heat exposure after the solvent has evaporated. Once user-set run time has expired, all functions cease.

PREHEAT button.
Pressing the button activates the heater to begin elevating to set point temperature. When in the preheat mode, the operator can monitor actual heat. Once set point temperature has been reached, samples can be added and program started.

Audible alarm signals completion of set point run time.
If it is desired to have the CentriVap run continuously without a set point time, the user may use the increase button until ON is displayed under RUN TIME.

Vacuum port with quick disconnect fitting.
Allows connection of a gauge to the CentriVap for monitoring vacuum level. Vacuum gauge and 1/4" ID tubing are required (not included). Contact Labconco for vacuum gauge recommendations.

Sleek styling.
Brushed stainless steel front panel and blue accents enhance appearance. Compact design has a small foot print.

Lid latch with safety sensor.
Locks the lid in place when the rotor is turning and prevents start up when the lid is open.

Large, phenol-free lid seal.
Ensures good vacuum without potential for phenol contamination.

Large chamber holds multiple samples for maximum throughput.
The 12" diameter chamber accommodates a variety of rotors, which hold up to 132 samples. The accessory Microtiter Plate Rotor holds four standard 96-well plates or two deep well plates.

Easy-to-read LCD display.
Prompts the user to set program parameters and displays program number, actual and set point temperatures, heat time remaining, run time remaining, and if optional Heat Boost is activated.

PREHEAT button.
Pressing the button activates the heater to begin elevating to set point temperature. When in the preheat mode, the operator can monitor actual heat. Once set point temperature has been reached, samples can be added and program started.

Electrical receptacle.
Allows connection of accessory vacuum pump so that pump may be activated from control panel and vacuum delay utilized.

ETL listed.
The CentriVap Concentrators carry the ETL Testing Laboratories seal in the U.S. and the ETL-C seal in Canada, signifying they meet or exceed all requirements of UL Standard 61010A-1 and CAN/CSA C22.2 No. 1010.1.

International electrical configurations available.
All 230 volt models conform to the CE (European Community) requirements for electrical safety and electromagnetic compatibility.

Reliability guarantee.
Full one year warranty is provided against defects in materials and workmanship.

*Teflon® is a registered trademark of E.I. du Pont de Nemours.
Control Panel

PROGRAM.
LCD shows program from 1 to 9, R for run and S for stop.

HEATER TIME.
LCD shows time selected for the first temperature from 1 to 999 minutes. During the run, the LCD shows time remaining.

Quick-Start™ buttons.
Initiate user-set Program 1, 2 or 3 with a single push of a button.

RUN/STOP button.
Press to start or stop a run.

Increase/Decrease buttons.
Press to increase or decrease the last selected set point parameter.

TEMPERATURE.
LCD shows heat from OFF to 99 (°C) or HI (100°C).

RUN TIME.
LCD shows time selected from 1 to 999 minutes. During the run, the LCD shows time remaining. If ON is selected instead of a time period, the CentriVap runs continuously.

Set Point SELECT button.
To select a parameter to change, press until the arrows on the LCD point to the parameter desired.

PREHEAT button.
Press to turn on the heater to preheat the chamber prior to loading samples.

Optional Accessories

Optional CentriZap® Strobe Light.
Enables the user to shine a strobe light into the chamber to easily view samples while the rotor is spinning. Samples appear to be standing still. The gun plugs into an outlet on the back of the CentriVap. A holster bracket is supplied and attaches to the right side of the CentriVap. See page 33.

Acid-Resistant Rotors.
Teflon*-coated aluminum rotors resist degradation from exposure to harsh chemicals. Six different rotors are offered. See page 33.

CentriZap Strobe Light allows the user to check sample status without stopping the rotor and opening the lid.

Exclusive feature "Teflon® is a registered trademark of E.I. du Pont de Nemours. Hastelloy® is a registered trademark of Haynes International, Inc.

www.labconco.com
CentriVap Cold Traps are an integral part of every CentriVap Aqueous, Acid, Solvent or Gel Dryer System. The Traps may also be used as a separate component in other laboratory applications such as freeze drying and desiccation. These cold traps protect the vacuum pump by trapping moisture, vapors and corrosive fumes as they evaporate from the samples. Three collector temperatures are offered: -50° C, -84° C and -105° C and selection should be based on the freezing point of the solvents being trapped.

Features and Benefits

**HCFC/CFC-free refrigeration system.**
Has a high capacity 1/3 hp compressor to lower cold trap temperature to -50° C (-58° F) in less than 30 minutes and accelerate start up procedures. The -84 Cold Traps have two compressors to lower cold trap temperature to -84° C (-119° F) in less than 40 minutes. The -105 Cold Traps have two compressors to lower cold trap temperature to -105 (-157° F) in less than 40 minutes.

**Acrylic or stainless steel lid.**
Has two Quick-Disconnect fittings for 1/2" ID hose for connecting the Cold Trap and Concentrator. Lid is acrylic on -50 Cold Traps and stainless steel on -84 and -105 Cold Traps.

**Reliability guarantee.**
Full one year warranty is provided against defects in materials and workmanship.

**Four liter stainless steel collector.**
Holds up to four liters of liquid and accommodates an optional Glass Insert 7397605 for use with corrosives.

**Temperature graph.**
Displays relative collector coil temperature. Green LED lights indicate conditions are right for beginning a process.

**Sleek styling.**
Brushed stainless steel front panel and blue accents enhance appearance.

**Collector drain.**
Corrosion-resistant nylon valve and stainless steel plumbing speed clean up and eliminate need for glass insert with non-corrosives.

**Optional Secondary Chemical Traps.**
Trap Inserts for removing acids, moisture, radiochemicals and solvents minimize release of contaminants into the atmosphere.

**International electrical configuration available.**
The 230 volt, 50 Hz models conform to the CE (European Community) requirements for electrical safety and electromagnetic compatibility.

**ETL listed.**
The 115 and 230 volt, 60 Hz CentriVap Cold Traps carry the ETL Testing Laboratories seal in the U.S. and the ETL-C seal in Canada, signifying it meets or exceeds all requirements of UL Standard 61010A-1 and CAN/CSA C22.2 No. 1010.1.
-50 Cold Trap Specifications

- Brushed stainless steel and glacier white, epoxy-coated steel exterior with blue accents.
- HCFC/CFC-free refrigeration system with 1/3 hp compressor lowers cold trap to -50°C (-58°F) in less than 30 minutes.
- 4-liter stainless steel collector.
- Lid with two Quick-Disconnect fittings for 1/2" ID hose, rubber gasket and insulating cover.
- Stainless steel drain port with nylon valve.
- Grounding clip.
- Temperature graph that illuminates green when the collector coil reaches operating temperature of -40°C (-40°F).
- ON/OFF power switch.
- ETL & ETL-C listings on 115 volt models.
- CE mark on 230 volt, 50 Hz models.
- Overall dimensions: 14.5" wide x 22.0" deep x 20.9" high (36.8 x 61.4 x 53.1 cm).
- Actual weight 70 lbs. (32 kg). Shipping weight 80 lbs. (36 kg)

-84 Cold Trap Specifications

Specifications are the same as for the -50 Cold Trap listed above except for the following differences.
- Brushed stainless steel lid.
- Two-Port Manifold.
- Clear Canisters and Chemical Trap Inserts.
- Glass Trap.
- Stainless Steel Lid

-105 Cold Trap Specifications

Specifications are the same as for the -50 Cold Trap listed above except for the following differences.
- Temperature graph that illuminates green when the collector coil reaches operating temperature of -70°C (-94°F) in less than 40 minutes.
- Overall dimensions: 24.1" wide x 23.9" deep x 17.6" high (61 x 61 x 45 cm).
- Actual weight 150 lbs. (68 kg). Shipping weight 170 lbs. (77 kg)

Accessories (See pages 32-35.)

- Clear Canisters and Chemical Trap Inserts
- Glass Trap
- Two-Port Manifold
- Stainless Steel Lid

See pages 30-31 for ordering information on CentriVap Systems consisting of the individual components bundled under one catalog number.
CentriVap DNA Vacuum Concentrators are expressly designed to speed evaporation of solvents from DNA samples and other very small samples. More compact than ever, the benchtop cabinet houses the concentrator, DNA Rotor, diaphragm vacuum pump, two glass traps and all connecting tubing. No additional components are required to begin processing.

**Features and Benefits**

- Large, phenol-free lid seal
- Versatile DNA Rotor included
- Large chamber holds multiple samples for greater throughput
- Integrated diaphragm pump
- Two 177 milliliter glass traps
- Vacuum port with quick disconnect fitting
- Easy-to-read LCD display
- Sleek styling
- Microprocessor-controlled 300-watt heater
- Memory stores 9 user-set programs
- Quick-Stop™ System
- Quick-Start™ One Button Start Up
- Memory stores 9 user-set programs
- Sleek styling
- Vacuum port with quick disconnect fitting
Features and Benefits

- **Sleek styling.**
  Brushed stainless steel front panel and blue labeling enhance appearance. Compact design incorporates a built-in diaphragm vacuum pump.

- **Microprocessor-controlled centrifugal motion.**
  Centrifugal force eliminates bumping and foaming common when applying vacuum during evaporation and maximizes recovery of trace solutes.

- **Quick-Stop™ System.**
  Once run time has expired or the RUN/STOP button is pressed, within seconds the vacuum pump stops, the valve opens to bleed air into the chamber, and the rotor stops.

- **Automatic vacuum release valve.**
  Prevents loss of sample by releasing the vacuum before the rotor stops and during power failures. The larger valve takes less time to release the vacuum.

- **Lid latch with safety sensor.**
  Locks the lid in place when the rotor is turning and prevents start up when the lid is open.

- **Large chamber holds multiple samples for maximum throughput.**
  The 12" diameter chamber accommodates a variety of rotors which hold up to 132 samples. The accessory Microtiter Plate Rotor holds four standard 96-well plates or two deep well plates. Thick-wall aluminum chamber is epoxy-coated for chemical resistance.

- **Versatile DNA Rotor included.**
  Accommodates up to 60 each 1.5 ml and 72 each 0.5 ml microcentrifuge tubes. Other accessory rotors are shown on pages 32-33.

- **Large phenol-free lid seal.**
  Ensures good vacuum without potential for phenol contamination.

- **Two 177 milliliter glass traps.**
  Protect the vacuum pump and the environment. One is located between the chamber and the vacuum pump. The other is located at the pump’s exhaust outlet.

- **Integrated diaphragm pump.**
  Corrosion-resistant. Achieves vacuum of 7 mBar and has a pumping capacity of 38 liters per minute. The built-in pump is easily removed for service.

- **Vacuum port with quick disconnect fitting.**
  Allows connection of a gauge to the CentriVap for monitoring vacuum level. Vacuum gauge and 1/4" ID tubing are required (not included). Contact Labconco for vacuum gauge recommendations.

- **Built-in vacuum delay.**
  Prevents bumping by allowing the rotor to achieve speed before applying vacuum.

- **Microprocessor-controlled 300-watt heater.**
  Speeds evaporation by supplying a controlled amount of heat from OFF up to a maximum of 100° C in one degree increments.

- **Quick-Start™ One Button Start Up saves time.**
  Pressing just one button starts the rotor, the heater, the timers and the vacuum pump. Three separate Quick-Start buttons store one user-set program each.

- **Easy-to-read LCD display.**
  Prompts the user to set program parameters and displays program number, actual and set point temperatures, heat time remaining and run time remaining.

- **Heat and run times are set separately.**
  Each from 1 to 999 minutes so that heat may be programmed to shut down sooner than the run to protect heat-sensitive samples from excessive heat exposure after the solvent has evaporated. Once user-set time has expired, all functions cease.

- **PREHEAT button.**
  Pressing the button activates the heater to begin elevating to set point temperature. When in the preheat mode, the operator can monitor actual heat. Once set point temperature has been reached, samples may be added and program started.

- **Memory stores 9 user-set programs.**
  Parameters of temperature, heat time and run time can be easily set with the touch of a few buttons. In addition, the user may alter temperature and times while the program is in progress.

- **Audible alarm signals completion of set point run time.**
  If it is desired to have the CentriVap run continuously without a set point time, the user may use the increase button until ON is displayed under RUN TIME.

- **ETL listed.**
  The 115 volt CentriVap DNA Concentrator carries the ETL Testing Laboratories seal in the U.S. and the ETL-C seal in Canada,signifying it meets or exceeds all requirements of UL Standard 61010A-1 and CAN/CSA C22.2 No. 1010.1.

- **International electrical configurations available.**
  The 230 volt model conforms to the CE (European Community) requirements for electrical safety and electromagnetic compatibility.

- **Reliability guarantee.**
  Full one year warranty is provided against defects in materials and workmanship.
Control Panel

PROGRAM.
LCD shows program from 1 to 9, R for run or S for stop.

HEATER TIME.
LCD shows time selected from 1 to 999 minutes. During the run, the LCD shows time remaining.

Quick-Start™ buttons.
Initiate user-set Program 1, 2 or 3 with a single push of a button.

Increase/Decrease buttons.
Press to increase or decrease the last selected set point parameter.

TEMPERATURE.
LCD shows heat from OFF to 99 (°C) or HI (100° C).

RUN TIME.
LCD shows time selected from 1 to 999 minutes. During the run, the LCD shows time remaining.

Set Point SELECT button.
To select a parameter to change, press until the arrows on the LCD point to the parameter desired.

PREHEAT button.
Press to turn on the heater to preheat the chamber prior to loading samples.

RUN/STOP Button.
Press to start or stop a run.

Optional Accessories

Optional CentriZap™ Strobe Light.
Enables the user to shine a strobe light into the chamber to easily view samples while the rotor is spinning. Samples appear to be standing still. The gun plugs into an outlet on the back of the CentriVap. A holster bracket is supplied and attaches to the right side of the CentriVap. See page 33.

Optional Glass Lid.
Provides additional protection from solvents and corrosives that attack acrylic. See page 35.

CentriZap Strobe Light allows the user to check sample status without stopping the rotor and opening the lid.

800.821.5525
Specifications

- Brushed stainless steel and glacier white, epoxy-coated steel exterior with blue accents.
  - Acrylic lid.
  - Lid latch with safety sensor.
  - Phenol-free lid gasket.
  - Epoxy-coated aluminum chamber.
- 300-watt heater.
- Microprocessor-controlled programming for run time from 1 to 999 minutes, heat from OFF to HI (100°C) in one degree increments and heat time from 1 to 999 minutes. Memory stores 1 to 9 programs.
  - LCD for display of program number, actual and set point temperature, heater time remaining and run time remaining.
- Control panel with RUN/STOP button, PREHEAT button, set point SELECT button, increase/decrease buttons, and 3 Quick-Start buttons.
  - Centrifugal motion provided by a brushless motor capable of achieving up to 1725 rpm.
  - Quick-Stop System to stop vacuum pump, open valve to bleed air into the chamber and stop the rotor within seconds after time expires or RUN/STOP button is pressed.
  - Built-in diaphragm pump achieves vacuum of 7 mBar and has displacement capacity of 38 liters per minute. All wetted parts are PTFE or other chemical-resistant fluoropolymers.
  - Automatic vacuum release valve.
  - Built-in vacuum delay allows rotor to achieve speed before applying vacuum.
  - Audible alarm to signal completion of set point run time.
- Two 177 milliliter glass traps.
  - Vacuum port with quick disconnect fitting for 1/4" ID tubing.
  - Includes DNA Rotor 7462900.
  - ETL & ETL-C listing on 115 volt, 60 Hz model.
  - CE mark on 230 volt, 50/60 Hz model.
  - Overall dimensions with closed lid: 15.1" wide x 28.5" deep x 11.2" high (38.3 x 72.4 x 28.4 cm).
  - Actual weight 80 lbs. (36 kg). Shipping weight 100 lbs. (45 kg).

Required Accessories (not included)
- Sample tubes. Contact your laboratory supply dealer.

Other Accessories (see pages 32-35)
- CentriZap Strobe Light
  - Rotors
  - Clear Canisters and Chemical Trap Inserts
  - Vacuum Controller
  - Glass Lid
  - Laboratory Carts

Exclusive feature

www.labconco.com
CentriVap Mobile Systems combine the separate concentrator and cold trap components into one space-saving console and include casters for portability from laboratory to laboratory. A rotor and solvent trap are also included with the CentriVap Mobile Systems. The interior can accommodate a vacuum pump—the only additional component necessary to begin concentrating.

**Features and Benefits**

- Optional microprocessor-controlled 300-watt Heat Boost™
- Large, phenol-free lid seal
- Sleek styling
- Vacuum port with quick disconnect fitting
- Four liter stainless steel collector
- Collector drain
- Space to house accessory vacuum pump
- Memory stores 9 user-set programs
- Large chamber holds up to 132 samples for greater throughput
- Glass lid
- Microprocessor-controlled 300-watt heater
- Versatile 12-13 mm Rotor included
- Quick-Stop™ System
- Quick-Start™ One Button Start Up
- HCFC/CFC-free refrigeration system
- Built-in chemical trap canister with Solvent Trap Insert
- 2-inch diameter hard rubber casters

800.821.5525
Features and Benefits

- **Sleek compact, mobile cabinet.**
  Brushed stainless steel front panel and blue accents enhance appearance. Mounted on 2-inch diameter hard rubber casters, the 13.75" wide cabinet may be moved easily from one work location to another. Uses less space than most carts yet houses the accessory vacuum pump.

- **Microprocessor-controlled centrifugal motion.**
  Centrifugal force eliminates bumping and foaming common when applying vacuum during evaporation and maximizes recovery of trace solutes.

- **Quick-Stop® System.**
  Once run time has expired or the RUN/STOP button is pressed, within seconds the vacuum pump stops, the valve opens to bleed air into the chamber, and the rotor stops.

- **Automatic vacuum release valve.**
  Prevents loss of sample by releasing the vacuum before the rotor stops and during power failures. The larger valve takes less time to release the vacuum.

- **Lid latch with safety sensor.**
  Locks the lid in place when the rotor is turning and prevents start up when the lid is open.

- **Larger chamber holds more samples for greater throughput.**
  The 12" diameter chamber accommodates a variety of rotors that hold up to 132 samples. The accessory Microtiter Plate Rotor holds four standard 96-well plates or two deep well plates. Thick-wall aluminum chamber is epoxy-coated for chemical resistance. Teflon®-coated chambers provide added corrosion resistance. Contact Labconco for ordering information.

- **Glass lid with large, phenol-free lid seal.**
  Glass resists solvents that attack acrylic. Lid seal ensures good vacuum without potential for phenol contamination.

- **Versatile 12-13 mm Rotor included.**
  Holds 92+ 12 x 75 mm or 13 x 75 mm tubes, 64 12 x 95 mm or 13 x 100 mm tubes, 16 12 x 55 mm tubes, and 40 1.5 ml or 2.0 ml microcentrifuge tubes. Other accessory rotors are shown on pages 32-33.

- **Built-in vacuum delay.**
  Prevents bumping by allowing the rotor to achieve speed before applying vacuum.

- **Microprocessor-controlled 300-watt heater.**
  Speeds evaporation by supplying a controlled amount of heat from OFF up to a maximum of 100º C in one degree increments.

- **Optional microprocessor-controlled 300-watt Heat Boost™.**
  Allows additional controlled heat from OFF up to a maximum of 100º C in one degree increments.

- **Quick-Start™ One Button Start Up saves time.**
  Pressing just one button starts the rotor, the heater, the timers and the vacuum pump. Three separate Quick-Start Buttons store one user-set program each.

- **Easy-to-read LCD display.**
  Prompts the user to set program parameters and displays program number, actual and set point temperatures, heat time remaining, run time remaining, and if optional Heat Boost is activated.

- **Heat and run times are set separately.**
  Each from 1 to 999 minutes, so that heat may be programmed to shut down sooner than the run to protect heat-sensitive samples from excessive heat exposure after the solvent has evaporated. The RUN TIME turns off all functions after the user-set period of time has expired.

- **PREHEAT button.**
  Pressing the button activates the heater to begin elevating to set point temperature. When in the preheat mode, the operator can monitor actual heat. Once set point temperature has been reached, samples may be added and program started.

- **Memory stores 9 user-set programs.**
  Parameters of temperature, heat time and run time can be easily set with the touch of a few buttons. In addition, the user may alter temperature and times while the program is in progress.

- **Audible alarm signals completion of set point run time.**
  If it is desired to have the CentriVap run continuously without a set point time, the user may use the increment button until ON is displayed under RUN TIME.

- **Four liter stainless steel collector.**
  Holds up to four liters of liquid and accommodates an optional Glass Insert 7397605 for use with corrosives (sold separately).

- **Collector drain.**
  Corrosion-resistant nylon valve and stainless steel plumbing speed clean up and eliminate need for glass insert with non-corrosives.

- **Built-in chemical trap canister.**
  Cutout in front panel provides at-a-glance trap monitoring. System includes one Solvent Trap Insert 7815200. Other inserts are available.

- **Electrical receptacle.**
  Allows connection of accessory vacuum pump so that the pump may be activated from the control panel and the vacuum delay utilized.

- **Vacuum port with quick disconnect fitting.**
  Allows connection of a gauge to the CentriVap for monitoring vacuum level. Vacuum gauge and 1/4" ID tubing are required (not included). Contact Labconco for vacuum gauge recommendations.

- **HFC/CFC-free refrigeration system.**
  The high capacity 1/3 hp compressor lowers cold trap temperatures to -50º C in less than 30 minutes and accelerates start up procedures. The system uses a CFC-free refrigerant that is environmentally friendly and does not harm the ozone layer.

- **ETL listed.**
  The 115 volt, 60 Hz CentriVap Mobile Systems carry the ETL Testing Laboratories seal in the U.S. and the ETL-C seal in Canada, signifying they meet or exceed all requirements of UL Standard 61010A-1 and CAN/CSA C22.2 No. 1010.1.

- **International electrical configurations available.**
  All 230 volt, 50 Hz models conform to the CE (European Community) requirements for electrical safety and electromagnetic compatibility.

- **Reliability guarantee.**
  Full one year warranty is provided against defects in materials and workmanship.

Control Panel

PROGRAM.
LCD shows program from 1 to 9, R for run or S for stop.

HEAT BOOST option.
LCD shows Y when Heat Boost has been selected; N when not selected.

Quick-Start™ buttons.
Initiate user-set Program 1, 2 or 3 with a single push of a button.

Increase/Decrease buttons.
Press to increase or decrease the last selected set point parameter.

Optional Accessory

Optional CentriZap™ Strobe Light.
Enables the user to shine a strobe light into the chamber to easily view samples while the rotor is spinning. Samples appear to be standing still. The gun plugs into an outlet on the back of the CentriVap. A holster bracket is supplied and attaches to the right side of the CentriVap. See page 33.

CentriZap Strobe Light allows the user to check sample status without stopping the rotor and opening the lid.

800.821.5525
Specifications

- Brushed stainless steel and glacier white, epoxy-coated steel exterior with blue accents and four 2" diameter hard rubber casters. Removable front panel provides access to interior space for vacuum pump (sold separately).
  - Glass lid.
  - Lid latch with safety sensor.
  - Phenol-free lid gasket.
  - Epoxy-coated aluminum chamber.
- 300-watt heater.
- Microprocessor-controlled programming for run time from 1 to 999 minutes, heat from OFF to HI (100° C) in one degree increments, heat time from 1 to 999 minutes, cold trap on/off, and optional Heat Boost on/off. Memory stores 1 to 9 programs.
- LCD for display of program number, actual and set point temperature, heater time remaining, run time remaining, cold trap activation and optional Heat Boost activation. When the cold trap is activated the LCD flashes Y until the collector coil reaches operating temperature of -40° C (-40° F) at which time the Y glows continuously.
- Control panel with RUN/STOP button, PREHEAT button, COLD TRAP button, optional HEAT BOOST button, set point SELECT button, increase/decrease buttons, and 3 Quick-Start buttons.
  - Centrifugal motion provided by a brushless motor capable of achieving up to 1725 rpm.
  - Quick-Stop System to stop vacuum pump, open valve to bleed air into the chamber and stop the rotor within seconds after time expires or RUN/STOP button is pressed.
  - Automatic vacuum release valve.
  - Built-in vacuum delay allows rotor to achieve speed before applying vacuum.
  - Audible alarm to signal completion of set point run time.
  - 1/2" OD aluminum hose fitting for connection to vacuum tubing. Vacuum pump is not included.
- Vacuum port with quick disconnect fitting for 1/4" ID tubing.
  - HCFC/CFC-free refrigeration system with 1/3 hp compressor lowers cold trap to -50° C (-58° F) in less than 30 minutes.
  - 4-liter stainless steel collector with acrylic lid with two Quick-Disconnect fittings for 1/2" ID hose, rubber gasket and insulating cover.
  - Front-mounted stainless steel collector drain port with nylon valve and grounding clip.
  - Built-in clear canister to accommodate chemical trap insert. Cutout in front panel provides at-a-glance trap monitoring.
  - Includes one Solvent Trap Insert 7815200 and 12-13 mm Rotor 7455100.
  - Electrical receptacle on the back to connect accessory vacuum pump to the system.

*System amperage shown includes 8 amp maximum vacuum pump rating
**System amperage shown includes 4.5 amp maximum vacuum pump rating
†International electrical configuration
††Electrical requirements for Cold Trap
†††Electrical requirements for Gel Dryer

CentriVap Gel Dryer Systems include the CentriVap Benchtop Concentrator, Cold Trap, Gel Dryer and connecting tubing. The diaphragm pump shown is sold separately. The Labconco Gel Dryer is also available as a separate item. See page 38 for ordering information.
**Accessories**

**Metal Rotors for Tubes**

Rotors hold tubes at an angle to maximize surface area. Depending on the rotor, made of anodized aluminum or Teflon*-coated metal with polypropylene hub. Easily interchangeable. The 12-13 mm Rotor 7455100 is included with each CentriVap Aqueous, Solvent, Gel Dryer and Mobile System. The 12-13 mm Rotor 7455101 is included with each Acid System. The DNA Rotor 7462900 is included with each CentriVap DNA Concentrator. **Sample containers are not included.** Contact Labconco for ordering information on custom rotors. Shipping weight 2.5 lbs. (1.1 kg)

Accessories

7464300 CentriZap Strobe Light
 Enables user to shine a strobe light into the CentriVap's chamber to easily view samples while the rotor is spinning. Includes mounting holster and hardware for attachment to the right side of the CentriVap. Shipping weight 2 lbs. (0.9 kg)

Diaphragm Vacuum Pumps
 The wetted parts of these pumps are PTFE or other fluoropolymers for corrosion resistance. Vacuum outlet is 1/2” OD.

Accessories

**7991000 Vacuum Controller**
Provides manual control and monitoring of vacuum levels. Analog gauge shows vacuum from 0-30" Hg. At the end of concentration, the control valve may be opened to break the vacuum. For use with Diaphragm Vacuum Pumps only. Shipping weight 3 lbs. (1.4 kg)

**7397605 Glass Trap**
Protects CentriVap Cold Trap reservoir and lid from corrosives. Included with CentriVap Acid Systems. Not compatible with pre-2005 Cold Traps or Mobile Systems. Shipping weight 4 lbs. (2 kg)

**7456600 Glass Lid**
May be installed in place of the acrylic lid on the CentriVap Concentrator when applications involve solvents which attack acrylic. Included on CentriVap Solvent System and selected models of CentriVap Benchtop Concentrators. Shipping weight 8 lbs. (3.6 kg)

**7386700 Stainless Steel Lid**
May be installed in place of the acrylic lid on -50 CentriVap Cold Trap when applications involve solvents which attack acrylic. Included on CentriVap Solvent and Proteomic Systems and -84 and -105 CentriVap Cold Traps. Shipping weight 8 lbs. (3.6 kg)

**7814300 Bleed Valve**
Bleeds vacuum manually when using the Cold Trap with other laboratory equipment. Shipping weight 0.5 lb. (0.25 kg)

**7814500 Vacuum Tubing Kit**
Two each 1/2" ID vacuum tubing, 48" length, and 4 tubing clamps. Shipping weight 6 lbs. (3 kg)

**7474000 Three-Way Valve**
Allows connection of other laboratory equipment to CentriVap System. Polypropylene, 0.5" OD. Shipping weight 0.5 lb. (0.25 kg)

**7397700 Two-Port Manifold**
Two-port manifold has neoprene rubber valves to allow freeze drying of small volume samples in freeze dry flasks, serum bottles or ampules. Connects to CentriVap Cold Trap, Ultra-Low Cold Trap or Mobile System. Requires use of Rotary Vane Pump. Not compatible with pre-2005 Cold Traps or Mobile Systems. Shipping weight 1.0 lb. (0.5 kg)

**8025000 Portable Table**
Chemical-resistant, two shelf cart accommodates the CentriVap DNA Concentrator. The shelves are high pressure laminate and the frame is epoxy-coated steel with 3-inch diameter casters. Supports loads up to 400 pounds. Lifetime warranty. 19" w x 34.9" d x 36.4" high (48 x 89 x 92 cm). Shipping weight 50 lbs. (23 kg).

**8075000 Variable Height Bench**
Chemical-resistant table with 5-inch diameter, toe-locking casters has height adjustment from 29.6 to 37.1". High pressure laminate work surface and frame of epoxy-coated steel. Supports loads up to 540 pounds. Lifetime warranty. 38" w x 28" d (97 x 71 cm). Shipping weight 105 lbs. (48 kg).

**8060000 Mobile Bench**
Chemical-resistant table with 5-inch diameter, toe-locking casters. High pressure laminate work surface and frame of epoxy-coated steel. Supports loads up to 540 pounds. Lifetime warranty. 48" w x 24" d x 37.2" high (122 x 61 x 94 cm). Shipping weight 105 lbs. (48 kg).

Diaphragm Pump is rated at 22 mBar ultimate vacuum and 82 liter/minute displacement. Chamber was preheated to set temperature prior to each run.
The rates below apply to the Refrigerated CentriVap Concentrators.

Methanol boiling point 65° C

www.labconco.com
Companion Products

Equipment that requires a vacuum pump for operation, such as the Labconco Vacuum Desiccator and Gel Dryer, may share the CentriVap Cold Trap or Mobile System. The CentriVap Cold Trap, which helps to protect the vacuum pump from moisture and other corrosive solvents, may be placed between the vacuum pump and any of these products. The Three-Way Valve 7474000 allows the cold trap and vacuum pump to service two instruments.

Gel Dryers

Dry large gels up to 13.2 x 16.7" (33.6 x 42.3 cm) or any combination of smaller gels for preservation or subsequent processing. Includes an 800-watt heating element, aluminum platen, 4-hour heating timer, 4-hour vacuum timer, temperature control knob with adjustment from 40° to 80° C. Includes a Mylar® sheet, porous polyethylene sheet, flexible mesh and translucent silicone rubber cover. An electrical outlet is provided for vacuum pump connection. 18.5" w x 19.5" d x 3.5" high (47 x 50 x 9 cm). Shipping weight 24 lbs. (11 kg). The Gel Dryer is also offered as a component of a CentriVap System. See page 31 for ordering information.

Vacuum Desiccator 5530000

Provides a cubic foot of interior space for storage of humidity sensitive materials. Vacuum tested to 29" Hg. Body is constructed of molded fiberglass reinforced polyester. Shipping weight 46 lbs. (21 kg).

FreeZone® Freeze Dry Systems

The CentriVap Benchtop Concentrator may be connected to an existing freeze dry system through a manifold valve and 1/2" freeze dry valve adapter. The freeze dry system’s collector then serves as a cold trap for the CentriVap Concentrator. Labconco’s FreeZone line of freeze dry systems includes lyophilizers with capacities up to 18 liters. A full line of accessory glassware, drying chambers and manifolds provide a complete freeze dry system. Contact Labconco for more information on these products.
Visit www.labconco.com or call Labconco at 1-800-821-5525 for additional information about these quality products for your laboratory.
