MAYBRIDGE

A true partner – not just another supplier – we offer the best and most cost-effective solutions available in the market, enabling you to concentrate on your core activities.

Whether you are engaged in initial research or scaling up to full production, inevitably you will need a product not readily available in a chemical catalog. Save time and resources by turning to the company you can trust.

We offer:

- 50+ years of experience in meeting customer-specific chemical needs
- a portfolio of more than 100,000 products
- a global network of over 3,500 chemical suppliers and partner manufacturers operating under Confidentiality Disclosure Agreements

Operating in key markets, we have a multidisciplinary team of dedicated experts in:

- Technical sourcing
- Product development chemistry
- Analytical science
- Packaging engineering
- Quality assurance
- Regulatory
- Technical project management
- Production engineering

For more information,
please contact your sales representative.

We support your Chemistry

Semi-Bulk & Bulk Chemical Service

Our extensive catalogue offering encompasses the Fisher Chemical, Fisher BioReagents, Acros Organics and Maybridge brands.

Are you aware you can also buy these products in semi-bulk and bulk volumes to meet your specific research and manufacturing needs? Through our global supply-chain network we can secure and manage the supply of semi-bulk and bulk volume products using either internal manufacturing or select partners. And, we can respond to your request within 24 hours.

Tailored Solvents and Solvent Blends

Why compromise with an “all purpose” solvent? We can tailor-make solvents to meet the specifications you provide for your application. Our experience in manufacturing, processing and testing high-purity solvents enables customization to your specifications.

In addition, our dedicated solvent mixing facilities can produce high-purity blends specified by our customers.

Testing Services

Our extensive in-house laboratory QC capabilities, and utilization of accredited external partners allows us to respond quickly to specific quality control testing at your request on chemicals you purchase from us.

This includes method development and validation, which establishes that the performance characteristics of an analytical method are suitable for its intended purpose.

All significant method characteristics are defined: Specificity, Reproducibility, Accuracy, Precision, Linearity, Limit of Detection, Limit of Quantitation and Range.

Customized Packaging and Labeling

Our products are available in a wide variety of innovative packaging designed for safety, environmental protection, convenient handling and storage and preservation of product integrity while complying with all relevant regulations. Custom-packaging is also available for chemicals supplied by you.

Our returnable drums and Fisher Paks are available in 10L to 1350L volumes to accommodate lab to production scale needs. By choosing this service, you will benefit from greater solvent purity and safety, improved productivity and lower environmental impact.

You also get convenience and choice with a range of accessories to fit your individual needs, including color-coded “quick connects”.

In addition, our custom weighing service can provide you with products from the Acros Organics and Maybridge brands at a scale from nanogram to ton – and in your own specified containers if required.

Special Solutions

We have experience in developing solutions for our catalog range, but if you have a special requirement for an aqueous or non-aqueous solution, we can manufacture it to your exact requirements.

Manufacturing Capabilities

Our blending, distillation, crystallization, testing, packaging and filling capabilities allow us to manufacture a broad range of products and deliver tailored chemical solutions to customers in the pharmaceutical, biotech and general industrial markets.

We specialize in high-volume packaging as well as custom micro-scale weighing, while maintaining chemical purity. Technology transfer is also a service capability we offer through our supply chain network.

Strategic Sourcing Expertise

Our sourcing team has the global reach to make the best buy available on the market without losing sight of local market demands, needs and expectations. We can provide a “lean” single supplier option and reliably manage multi-product supply projects.

Our Technical Sourcing specialists work with you to understand your process requirement and with our supply partners to ensure these requirements are met in full, on time.

www.wesupportyourchemistry.com

Quality & Reliability

All of our manufacturing and QC processes are written in standard operating procedures and are carefully followed to assure specifications and the consistency of products we deliver.

Our manufacturing quality is reflected in a variety of certifications and licenses that we hold, including our ISO 9001:2008 and ISO 14001:2004, FDA, DEA and ATF licenses, which are regularly audited. We welcome pre-arranged customer visits to our sites to showcase our capabilities and competencies. Our testing capabilities include:

Spectroscopy – Atomic Absorption Spectroscopy (AAS), Inductively Coupled Plasma Mass Spectroscopy (ICP-MS), Ultraviolet-visible Spectrophotometry (UV), Fourier Transform Infrared (FTIR), Fluorescence Spectroscopy and Nuclear Magnetic Resonance (NMR).

Chromatography – Gas Chromatography (GC) with a range of detectors, GC-Mass Spectrometry; High Performance Liquid Chromatography (HPLC) with diode-array or refractive index detectors, HPLC- Mass Spectrometry and Thin Layer Chromatography (TLC).

Other capabilities – Differential Scanning Calorimetry (DSC), optical rotation, specific gravity, density, viscosity, melting point, refractive index, Karl Fisher moisture analysis (KF), loss on drying (LOD), ash determination, particle size and color scale measurement are also available.

In short, we can provide virtually any chemical, test it, package it and deliver it to your exact specifications.

So the next time you have a unique chemical need,
let our experts make your life easier!
