Section 3 - Hazards Identification

**EMERGENCY OVERVIEW**

Appearance: colorless to white crystals.  
**Danger!** May be fatal if inhaled, absorbed through the skin or swallowed. Contact with acids liberates very toxic and explosive gas, hydrazoic acid vapor. Reacts with many heavy metals to form explosive compounds. Forms hydrazoic acid in water which volatilizes readily at 99°F. Hydrazoic acid is a colorless, volatile, highly toxic and highly explosive liquid with a characteristic odor, which has been described as sickening. Heating may cause
an explosion. Causes eye, skin, and respiratory tract irritation. May cause cardiac
**Target Organs:** Central nervous system, lungs, cardiovascular system, eyes, skin.

**Potential Health Effects**

**Eye:** Causes eye irritation. Contact with dust or vapor may cause systemic toxic
**Skin:** Causes skin irritation. May be fatal if absorbed through the skin. If absorbed, causes
symptoms similar to those of ingestion.
**Ingestion:** May be fatal if swallowed. Causes gastrointestinal irritation with nausea,
vomiting and diarrhea. Sodium azide may cause hypotension (abnormally low blood
pressure), tachycardia (rapid heart rate), tachypnea (quick, shallow breathing),
hypothermia (low body temperature), convulsions and severe headache.
**Inhalation:** May be fatal if inhaled. Dust is irritating to the respiratory tract. May cause
effects similar to those described for ingestion. Rapidly absorbed. The vapor of hydrazoic
acid may be present where sodium azide is handled. Symptoms of acute exposure to
hydrazoic acid include eye irritation, headache, dramatic decrease in blood pressure,
weakness, pulmonary edema, and collapse.
**Chronic:** Chronic inhalation and ingestion may cause effects similar to those of acute
inhalation and ingestion.

**Section 4 - First Aid Measures**

**Eyes:** In case of contact, immediately flush eyes with plenty of water for at least 15
minutes. Get medical aid.
**Skin:** In case of contact, immediately flush skin with plenty of water for at least 15
minutes while removing contaminated clothing and shoes. Get medical aid immediately.
Wash clothing before reuse.
**Ingestion:** Call a poison control center. If swallowed, do not induce vomiting unless
directed to do so by medical personnel. Never give anything by mouth to an unconscious
person. Get medical aid.
**Inhalation:** POISON material. If inhaled, get medical aid immediately. Remove victim to
fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen.
**Notes to Physician:** Treat symptomatically and supportively.

**Section 5 - Fire Fighting Measures**

**General Information:** As in any fire, wear a self-contained breathing apparatus in
pressure-demand, MSHA/NIOSH (approved or equivalent), and full protective gear. Vapors
may form an explosive mixture with air. Water reactive. Contact with metals may evolve
flammable hydrogen gas. Containers may explode when heated. Approach fire from upwind
to avoid hazardous vapors and toxic decomposition products. Forms explosion sensitive
compounds with some metals such as lead and copper. Form hydrazoic acid vapor in contact with acid or water. Hydrazoic acid vapor is highly toxic and a dangerous explosive. Hydrazoic acid is shock sensitive.

**Extinguishing Media:** Use dry chemical, carbon dioxide, or alcohol-resistant foam. Do NOT get water inside containers.

**Flash Point:** Not applicable.

**Autoignition Temperature:** Not available.

**Explosion Limits, Lower:** Not available.

**Upper:** Not available.

**NFPA Rating:** (estimated) Health: 4; Flammability: 1; Instability: 3; Special Hazard: -W-
safety shower.
